## MANUAL OF CLINICAL CHEMISTRY (CLASSIC REPRINT) (PAPERBACK)

Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from Manual of Clinical Chemistry In this small volume will be found the essentials of chemical diagnosis; or a description of all those chemical processes most useful to the practising physician. It is made up of the last eighty eight pages of the Text-book of Medical and Pharmaceutical Chemistry, with the addition of a chapter of Notes on Urinary Diagnosis, and a collection of well-selected experiments with carbo hydrates, fats, proteids, and milk, and a scheme for the qualitative analysis of commercial prepared foods. The Notes on Urinary Diagnosis are essentially the skeleton notes of a course of lectures given for some years, in connection with the course in urinary analysis, at the Long Island College Hospital. The experimental study of the proximate principles of foods, presented at the beginning of the book, is warranted, the author thinks, by the great importance of dietetics in general, and especially of infant feeding. The experimental study of these substances should be undertaken before taking up the more difficult quantitative examination of milk, gastric contents, and urine. It is recommended that these experiments be taken up in connection with the descriptive text, or in connection with the lectures or recitations upon these substances.
