CARBON AND NITROGEN REDISTRIBUTION ACROSS THE LANDSCAPE AND ITS INFLUENCE ON PADDY RICE PRODUCTION IN NORTHWEST VIETNAM

Cuvillier Verlag Jan 2012, 2012. Taschenbuch. Condition: Neu. Neuware - As a result of demographic pressure, governmental policies and improved market access, agricultural practices were intensified in the tropical mountainous areas of Southeast Asia. Side effects are water erosion and landslides on steep slopes creating tremendous sediment fluxes in these mountainous headwater systems. The construction of reservoirs allowed storing rainfall and runoff water in order to feed irrigation systems, supporting a second rice crop outside of the rainy season. In...
