University of Texas Press. Paperback. Condition: New. 207 pages. Dimensions: 9.0in. x 6.0in. x 0.8in. The Olmecs are renowned for their massive carved stone heads and other sculptures, the first stone monuments produced in Mesoamerica. Seven decades of archaeological research have given us many insights into the lifeways of the Olmecs, who inhabited parts of the modern Mexican states of Veracruz and Tabasco from around 1150 to 400 BC, and there are several good books that summarize the current interpretations of Olmec prehistory. But these formal studies don't describe the field experiences of the archaeologists who made the discoveries. What was it like to endure the Olmec regions heat, humidity, mosquitoes, and ticks to bring that ancient society to light? How did unforeseen events and luck alter carefully planned research programs and the conclusions drawn from them? And, importantly, how did local communities and individuals react to the research projects and discoveries in their territories? In this engaging book, a leading expert on the Olmecs tells those stories from his own experiences and those of his predecessors, colleagues, and students. Beginning with the first modern explorations in the 1920s, David Grove recounts how generations of archaeologists and local residents have uncovered the Olmec past and pieced together a portrait of this ancient civilization that left no written records. The stories are full of fortuitous discoveries and frustrating disappointments, helpful collaborations and deceitful shenanigans. What emerges is an unconventional history of Olmec archaeology, a lively introduction to archaeological fieldwork, and an exceptional overview of all that we currently know about the Olmecs. This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Paperback.
