

Implementation of an Enterprise Resource Planning System with Focus on End-User Training

By Elke Simon

Diplom.De Nov 1999, 1999. Taschenbuch. Book Condition: Neu. 210x148x7 mm. This item is printed on demand - Print on Demand Titel. Neuware - Diploma Thesis from the year 1999 in the subject Business economics - Supply, Production, Logistics, grade: 1,0, University of Applied Sciences Fulda (Informatik), language: English, abstract: Inhaltsangabe:Abstract: The implementation of an Enterprise Resource Planning (ERP) system refers to Information Systems, Business Processes, and People. Basically, it is a changing procedure in organizations that strive for company-wide high performance. Business Process Transformation is about changing a company's focus - from products to customers. Information Systems are replaced by a homogenous system environment which integrates all information into a common system. The behaviour and skills of the company-wide personnel are adapted to perform in the new 'world'. The big challenge of the implementation is to have the properly-trained people for a high-performance organization. Unfortunately, most companies do not recognize that need. They underestimate the impact that the human factor has on an ERP approach; they consider the implementation as a software-installation with influence to the business. But, the implementation is much more complex. This thesis is dedicated to all those persons who intend to implement an Enterprise Resource...

Reviews

This book is great. It is written in simple words and not difficult to understand. I discovered this pdf from my dad and I suggested this ebook to find out.
