

Report of the Chief of the Bureau of Chemistry and Soils, 1937 (Classic Reprint) (Paperback)

By Henry G Knight

Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Report of the Chief of the Bureau of Chemistry and Soils, 1937 The production of agricultural materials through the medium of plant growth depends on chemical processes, energized by sunlight, in which the raw materials are carbon dioxide; oxygen, and nitrogen of; the air and numerous soil constituents including water, inorganic compounds derived from minerals, and organic compounds j formed through the action of - micro-organisms on the products of former plant and animal life. Whether or not these chemical processes go on depends not only on the availability of energy, but also on the availability of raw materials. Since the gases of the atmosphere and sunlight, in most places and at certain seasons, are always sufficiently abundant, it is the availability of raw materials from the soil which determines the course and efficiency of nature's chemical processes that result in agricultural plant and animal products. One of the most important of these raw materials is water, the availability of which in suitable quantity depends primarily on the physical and chemical properties of the soil colloids which make it...
