

## Memoria (1)

Filesize: 1.42 MB

### ***Reviews***

*Very good e-book and helpful one. It is among the most awesome publication we have read. Its been developed in an remarkably simple way in fact it is simply right after i finished reading this book through which basically transformed me, affect the way i really believe.*

*(Prof. Kacey O'Hara)*

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 60 pages. Original publisher: Stanford, Calif. : Stanford University, W. W. Hansen Experimental Physics Laboratory ; Washington, D. C. : National Aeronautics and Space Administration, 1990 OCLC Number: (OCoLC)61354919 Excerpt: . . . proton background is an unknown, reliable estimates have been made by Dave Thompson and Carl Fichtel 8 . 1. 6 A Treatment of the Problem The most significant hurdle to overcome in treating this back-ground problem is the calculation of its rate for a particular satel-lite design. If the calculation were simple, then the rate could be calculated and accounted for in any measurement. As was mentioned above, however, the vast majority of interacting pro-tons produce charged secondaries, so the vast majority of poten-tial background gamma rays are vetoed. In addition, the physics involved in a nuclear reaction is quite complex. Both of these facts indicate that a simple back-of-the-envelope calculation will not suffice to predict the background rate, although a simplified physical argument will be given later to augment a more detailed calculation. With access to powerful computers at SLAC and data on cos-mic ray composition, it has proven possible to predict the back-ground rate for several gamma-ray telescopes. This prediction can be compared in limiting cases to other measurements to verify its accuracy. 11 This item ships from La Vergne,TN. Paperback.
