

The First Flower: How Pollination Works and Why Insects are So Important (Paperback)

By R Beaumont-Parkinson

AUTHORHOUSE, United States, 2009. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.This new book is a light and funny children s story explaining how pollination works, illustrated with original artwork by Kim E Styles. From pre-historic times with the dinosaurs, to the present day. Before butterflies and bees; what were the first pollinators? What is nectar for and what does pollen do? Where are the Stamen, stigma and sepals on a flower? Useful for parents and teachers. The main part of the book is a fictional story, which is entertaining for children from 4 to 11 years and those learning to read. Each page has large colourful artwork to hold a child s attention. Educational facts in the last quarter help to introduce children to, biology, botany, ecology and insect pollinators; illustrated with colour photographs and clear diagrams. Children are encouraged to look closer at the plants and insects in our world and start to understand how they live and reproduce. With sound environmental and ecological information. It will help children to understand the plants and insects on our planet, and why conservation is so important. As we are becoming more aware and in...
